OUR MISSION

Compass International School Doha provides a holistic, internationally minded and stimulating education for forward-thinking, responsible and inquiring global citizens. Our broad curriculum allows students to embrace challenge and change, and to celebrate cultural diversity in order to fulfill their potential as independent, lifelong learners in a caring and respectful community. Our philosophy is aimed at preparing students for future success and encouraging them to drive the innovation of tomorrow.

OUR VISION

Compass International School Doha aspires to deliver an outstanding and challenging education in an inter-cultural, respectful and nurturing environment. Our learners become inquisitive, reflective and proud to belong to an academically successful school.

MESSAGE FROM OUR PRINCIPAL

Dear Parents and Students,

I am delighted that you are interested in our school. There is so much I would like to share with you about our warm and welcoming community through this short introduction and prospectus.

The most important person in the learning and growing of your child is the person who stands in front of (and alongside), him or her each and every day... the teacher! For that reason, we go to great lengths to recruit and retain the very best caring and passionate teachers who will provide an appropriately challenging, relevant, and inspiring learning experience. Along with the support and involvement of Nord Anglia Education, this ensures that our children not only flourish to a high standard, but that they also wake up each day and look forward to coming to school!

Founded in 2006, Compass has matured and grown to provide for 1800 students from Primary through to Secondary in our three campuses. Our growth and development has reflected the success and ambition of our dynamic host country the state of Qatar, as the world's eyes turn to see the amazing programme it has in store for the FIFA World Cup 2022.

At the core of our learning and growing experience is a premium, quality, international British Education provided right here in Doha, with all the prerequisite standards and expectations that come with that. But, what makes what we do so special is the key ingredient and influence of our warm and welcoming community. Within this nurturing 'can-do' environment, your children will grow and achieve beyond their potential with all the necessary life skills including diligence, resilience and compassion to ensure their success and happiness both today and tomorrow.

I do hope you are able to visit us at Compass to experience first-hand the presence and influence of this community of learners which has served many happy and loyal families over the years, and paved an exciting life journey for our graduates.

Please enjoy your peek through the window of our prospectus and thank you once again for your interest in joining us. I look forward to meeting you to share more of the good news that is Compass!

A handwritten signature in white ink, appearing to read 'PJD', with a stylized flourish extending from the bottom right.

BUILDING A STRONG FOUNDATION

EYFS CURRICULUM

Taught at: Gharaffa and Themaid

The Early Years Foundation Stage (EYFS) at Compass International School consists of Early Years 1 and Early Years 2 and encompasses the time in your child's life from age 3 to 5.

Our aim at Compass International School is to provide a happy, safe and progressive environment, in which your child will develop the necessary skills to enable them to become Independent, ambitious, lifelong learners.

In our Early Years classrooms, we bring together the power of two international programmes to lay a strong foundation for future learning: The Early Years Foundation Stage Framework and the topics and themes used in the International Primary Curriculum (IPC).

NURTURING YOUNG MINDS

PRIMARY CURRICULUM

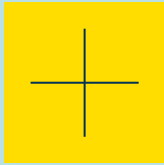

Taught at: Madinat Khalifa, Gharaffa and Themaid

Our primary school experience is designed to nurture creative, inquisitive and open minds, and to ensure that every child progresses to secondary level with the academic and social confidence and ambition necessary to make their mark.

At Compass International School we follow the English National Curriculum and the International Primary Curriculum which is a comprehensive, thematic, creative curriculum, with a clear process of learning and specific learning goals for every subject.

As part of the IPC, children explore “Units of Work”, which lasts between three to six weeks and focus on themes that will keep students excited by the learning experience. Your child will be challenged to see subjects from different points of view, and to connect things together. It is a creative system which enables your child to grow academically and socially, and to see the world as an inspiring blend of experiences and cultures.

CREATING GLOBAL THINKERS

SECONDARY CURRICULUM

A-Levels (Themaidd)

A-Levels or Advance Level qualifications are a subject-based qualification studied over 2 years in Years 12 and 13. Students typically study four subjects in Year 12 before taking three subjects forward to Year 13 where the subjects are studied in a greater depth.

Nord Anglia Education schools have an outstanding track record in preparing students to excel in A-Levels and beyond. World-renowned universities regard the A-Level and Ed Excel programme as a course which produces well-rounded individuals who are prepared to embrace opportunities anywhere in the world.

With our small class sizes and outstanding facilities, our Themaidd Campus is one of the best places in Qatar to study A-Levels and to give your child a head start in their education and in their career.

IB Diploma (Madinat Khalifa)

At age 16 and above (Years 12 and 13), students can apply to study for the International Baccalaureate Diploma Programme (IBDP).

This two-year course is a balanced academic programme, aimed at developing students who have excellent breadth and depth of knowledge. A key focus of the IBDP is on building confidence and leadership skills and broadening the students' understanding of world cultures.

Globally-renowned universities regard the IB Diploma Programme as a course which produces well-rounded individuals who are prepared to embrace opportunities anywhere in the world and Compass International School Madinat Khalifa Campus is the best school in Qatar to study the IB.

PREPARE YOUR CHILD FOR THE WORLD STAGE

DRIVING INNOVATION

At Nord Anglia Education, we inspire curiosity and innovative thinking in our students – giving them the tools and skills to succeed.

Our educational approach uses our global reach, enabled by world-class technology, to bring our students truly transformational learning experiences.

We work with world leading organisations to give our students an even more enriching learning experience.

Juilliard

Juilliard Collaboration

Delivered exclusively to NAE students, the Juilliard-Nord Anglia Performing Arts programme has NAE teachers working together with Curriculum Specialists to enhance the way we teach our performing arts curricula and promote excellence, inspiring your child to engage and connect with music, dance and drama at a deeper level.

There are 4 key components to the Juilliard collaboration:

1. Enhanced curriculum
2. Professional development
3. Juilliard artist visits
4. Summer performing arts with Juilliard

MIT Collaboration

The MIT-Nord Anglia STEAM Programme enables students to experience a university-inspired approach to learning STEAM subjects. Your child will learn from MIT researchers, scientists and experts at the forefront of these fields, as well as taking a hands-on approach to problem solving.

There are 3 key components to the MIT collaboration:

1. In-School STEAM Challenges
2. NAE STEAM week @ MIT
3. Specialised teaching

LEARNING BETTER TOGETHER

unicef  | for every child

Unicef Collaboration

For many, making the world a better place is a dream they would one day like to accomplish. Through our collaboration with UNICEF, we provide students with tangible activities and challenges so that they can take direct action to make this dream a reality.

Your child will research, develop and debate challenges facing our society, and take action to address them. Through special activities and events with UNICEF, your child will be equipped to make their voice heard on the world stage and to make a lasting, positive difference.

There are 2 key components to the UNICEF partnership:

1. Annual global challenge
2. Sharing ideas on the world stage

Global Campus Platform

Learning has no limits at Nord Anglia Education. Every Nord Anglia school offers engaging learning environments to ensure your child loves coming to school. All students are a part of more than just their own school; they are involved in a virtual learning environment called Global Campus where they learn with fellow students around the world.

Nord Anglia students are at the heart of every aspect of Global Campus. Through Global Campus your child can learn from invited experts, take part in various challenges and competitions, or collaborate with peers before and after regional festivals, sports events or global expeditions.

There are 4 key advantages to the NAE Global Campus Platform:

- Immerses students in international projects and challenges
- Cultivates students' skills in global networking
- Encourages students to discuss collaborate, compete and celebrate with one another
- Amplifies students' classroom learning through one-of-a-kind experience

DUKE OF EDINBURGH

The Duke of Edinburgh's International Award equips young people for life. It is the world's leading youth achievement award. Since the Award's launch 60 years ago, it has inspired millions of young people to transform their lives.

The Duke of Edinburgh Award complements the Compass ethos perfectly by helping students develop life skills in leadership, teamwork, resilience, self-confidence, problem-solving, time management and communication. In addition, universities and employers recognise the achievements of Award holders, improving their chances of moving forward in education or getting a job.

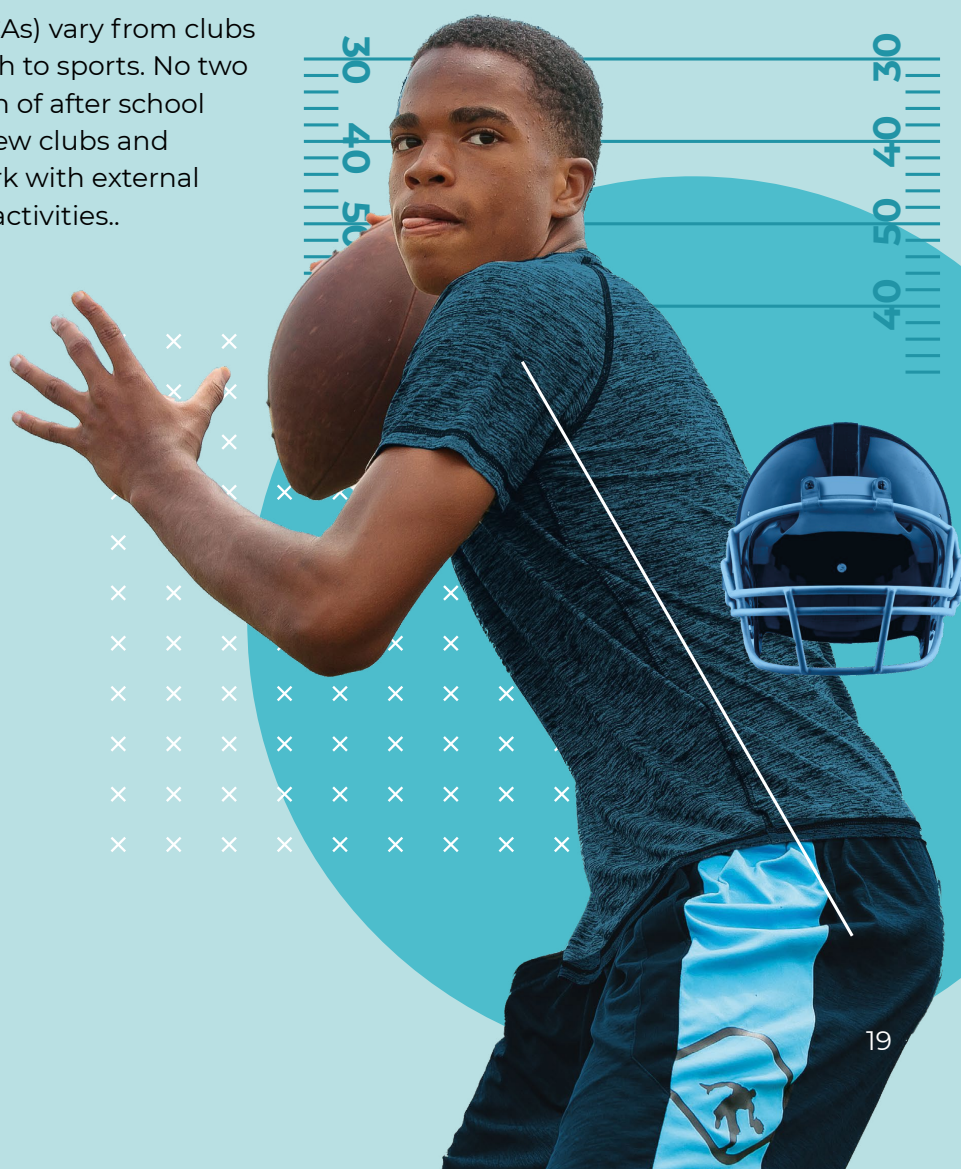

ECA'S AND PHYSICAL ACTIVITIES

PHYSICAL EDUCATION AND SPORT

Physical Education and Sport programmes are an important and compulsory part of the curriculum and include games, netball, football, basketball, gymnastics, athletics, dance and swimming amongst others.

EXTRA-CURRICULAR ACTIVITIES

Our Extra-Curricular Activities (ECAs) vary from clubs to music, arts and culture, through to sports. No two terms offer the same combination of after school activities, and our teachers add new clubs and activities all the time. We also work with external companies to provide additional activities..
