ready to learn

75%
increase
in **focus** during
their sessions

We explored how robotics can support teachers in creating more inclusive learning environments. Students interacted with classroom robots during personalised sessions designed to encourage communication, engagement, and emotional connection.

Students who may previously have found interaction more challenging became more confident, more engaged, and more willing to participate in classroom learning.

At Nord Anglia, we believe every child deserves to feel included, understood, and empowered to succeed.
