\$2 per minute every minute thereafter.

Early Childhood ACE Class Descriptions

Abrakadoodle Art

At Abrakadoodle Art, we strive to spark your child's imagination while they think, create, discover, problem solve and build confidence.

Each child creates original artwork which reflects his or her own personal interpretation. We want imaginative and curious children to grow up into creative and inventive adults.

Blissful Movement Dance

Blissful Movement Dance Company believes in the spirit of well-rounded dancers. Our dance group has a team of professional dance instructors that will help assist and teach each child in their dance genre journey such as; jazz, ballet, hip hop, modern, contemporary, tumbling / tricks, and many more.

Blissful Movement Dance Company will host a recital at the end of each semester to showcase what your dancer has learned!

**Class cost includes jazz shoes and Blissful Movement Dance Company T-Shirt*

Clubhouse

This is our Early Childhood general care class. In Clubhouse, students continue to learn while participating in themed weekly activities which include story and circle time, games, books, and more!

Students are given the opportunity to practice their fine motor skills as they complete a weekly craft and engage in daily outdoor time (weather permitting)

Fairy Tales and Problem Solving

Lead by our very own Early Childhood teachers, Fairy Tales and Problem Solving is perfect for the curious pre-school student! Consider the story of The Three Billy Goats Gruff...

Can you design a boat for the goats to use to get across the river without using the bridge? Can you design and build a NEW bridge? How about creating a trap to catch the troll? Each week students work in teams to solve a nursery rhyme or fairytale problem.

Intro To French

Introduction to French will allow students to begin their journey of learning the French language with weekly lessons that include songs, shapes, numbers, sight words, seasons and more!

This class is introductory and will help students get excited about the language which they will take in kindergarten. Taught by Village's own Lower School French teacher, Amel Hafsaoui.

Introduction to LEGO

The Introduction to LEGO will give the students a space to use their imagination and bring their thoughts to life. The class will use Duplo Legos which are larger and easier to put together. The curriculum will include free build, category build, and lesson-based building. We cannot wait to see what our students create in this class!

Intro to Spanish

Introduction to Spanish take student on a journey to learn basic Spanish which includes songs, shapes, numbers, sight words, time, seasons and more!

This foundation in Spanish will help students get excited about the language which they will take in kindergarten. Taught by Village's own Lower School Spanish teacher, Yesenia Martinez.

Junior Scientists

Led by our very own Early Childhood teachers, students will experiment and explore the world of science! Your child will have opportunities to do begin their journey into the world of STEAM with weekly hands-on experiments while learning the introduction of becoming a scientist!

Karate

Parents can expect to see their child learn the importance of discipline, physical fitness and flexibility. All while developing an understanding of beginner karate stances, punches/strikes, kicks and more. Our program discourages youngsters bullying fellow scholars, as they learn how to avoid being bullied through self-defense, focus, concentration, humbleness. Students learn to exercise quietness in Academic classrooms.

**Karate uniform available for an additional fee*

Soccer Tot Stars

Soccer Tot Stars is a high-quality sports program specifically designed to teach children aged 2 to 12 years old the structure of soccer through fun activities that develop each child's cognitive, gross motor, and social skills.

We teach children in a language they can understand, present skills in a way that captures their attention, but more importantly we make learning fun.

Sports Explosion

Introduce young children to a variety of sports, emphasizing fun, teamwork, and foundational skills. By the end, participants will have experienced a broad range of activities that not only promote physical health but also cultivate an interest in sports.

The sports will include, frisbee, kickball, obstacle course, basketball, sports movement, tee ball, corn hole, tennis, and so much more.

Yoga

Yoga classes do not only help to develop our bodies physically but also improve our mental health. Our after-school yoga classes will help students develop and nurture flexibility, strength, and mental wellness.

Students will learn calming techniques that will teach them to overcome anxieties, anger, or stresses, that will enable them to build social and emotional skills while also developing their athleticism.
